

United States Potato Acreage Planted Estimate

June 30, 2021

Top Thirteen States

State	2019	2020	2021	Percent
Idaho	310,000	300,000	315,000	+5.0%
Washington	165,000	155,000	160,000	+3.2%
North Dakota	73,000	72,000	73,000	+1.4%
Wisconsin	70,000	70,000	67,000	-4.3%
Maine	52,000	51,000	56,000	+9.8%
Colorado	51,300	54,000	53,000	-1.9%
Michigan	49,000	48,000	47,000	-2.1%
Oregon	45,000	45,000	45,000	0.0%
Minnesota	46,000	42,000	44,000	+4.8%
California	42,000	32,000	29,000	-9.4%
Florida	27,000	22,000	22,000	0.0%
Nebraska	20,000	19,000	21,000	+10.5%
Texas	18,000	11,000	11,000	0.0%
Total U.S.	968,300	921,000	943,000	+2.4%

Source: USDA National Agricultural Statistics Service June 2021

Total Planted Acreage includes 13 states reporting to USDA, NASS. United States growers planted 22,000 acres or 2.4% more than a year ago when they were dealing with cutbacks related to COVID-19. Potato acreage is still 25,000 acres below 2019 estimates, with water availability in California, playing a role.
