Total Canada	5,630	6,021	6,368	6,006	9,420	57%

Potatoes in Canada that are anticipated to be used for Table consumption as of April 1, 2022, are at 9.4 million hundred weight, well above both year ago and historical levels. Demand and disappearance have been trend setting throughout the winter months. In comparison to previous years, Eastern packers will have ample supply to run late into summer, and right into new crop.
