### NOTES:

Some higher numbers for tablestock in the East as has been the trend so far in 2022. Much higher than average numbers in New Brunswick may include some processing potatoes switched over as contracts to ship out west were stopped. Most of these stocks are in Russets, yellows and reds have continued to ship and are being depleted.

Good quality lots are in demand. Any bins with pressure bruise or other storage issues may not make it to the end.
